Continuation of 5. does NOT place the application in condition for allowance because: Arguments are not persuasive. Applicant argues that the recitation "superimposed over" (which was added by a prior amendment) is adequately supported by the original disclosure and that it overcomes the applied prior art. Examiner maintains that the specific aspect of "superimposed over" that Applicant relies on is not adequately supported because there is no specific reference (or significance) to the relative direction of vertical up or gravity vector down There seems to be no patentable relevance of "superimposed over" relative to the originally disclosed "aligned with". The disclosures of the prior art and the disclosure of the Applicant seem to have no relevance to "over", because there is no specific teaching of the role of gravity. Examiner considers they would all work equally well if vertical up were taken to be in most any direction given no gravity vector reference in the enabling disclosures.
